

PRODUCT CATALOGUE

Our History

PMB Shelving Office Furniture is a family-owned company established in the early 70's as a supplier of second-hand shelving, office furniture and basic business equipment. From its humble beginnings the company grew to become a recognized and established supplier of new and second-hand shelving and office furniture to businesses throughout Pietermaritzburg and large parts of the KZN and Eastern Cape area. The company later ventured into catering equipment and commercial refrigeration and various other business equipment products ensuring it's the only one-stop business equipment centre in southern Africa. We now host a large range of local and imported products to suit the needs and applications of businesses from various different industries. We've has grown to specialize in basic shelving and office furniture needs as well the more advanced and sophisticated application requirements. We now have over 30 years of experience, having serviced thousands of businesses in various areas of the country.

Our Mission

We are dedicated and committed to servicing the various basic and advanced needs of small to large businesses across all industries to the best of our knowledge and ability. We will continuously strive to ensure that we offer our clients expert advice, excellent product quality, and maintain high standards of service delivery and customer satisfaction.

Our Vision

Our goal is to be industry leaders ensuring we are a preferred supplier of business equipment to business across the country as well as abroad.

SHELVING SYSTEMS AND SOLUTIONS

GONDOLA SHELVING

All units, shelves and fittings are interchangeable, and can be assembled with ease and speed. The Gondola System is ideally suited for use in a wide range of retail outlets including pharmacies, supermarkets, bottle stores, hardware stores and various retail stores.

RIVET SHELVING

Durable shelving ideal for use in warehouses, offices and retail stores. Our single rivet beam high density shelving is designed to provide for maximum vertical clearance between shelves. Access to stored items from all sides is possible because side and back cross braces are not necessary for stability.

BOLTED STEEL SHELVING

CLOSED BACK AND SIDE BOLTED STEEL SHELVING

These shelving units are closed on three sides with steel panels. When units are joined side by side and back-to-back, a common side or back panel is used between the two units achieving a large cost saving.

OPEN BRACED BOLTED STEEL SHELVING

These shelving units are the most basic and economical shelving design for general purpose use. Back and sides are open, except for sections that are stabilised by means of cross braces on the back and side.

RACKING SYSTEMS AND SOLUTIONS

SELECTIVE PALLET RACKING:

The most common method of storing pallets is Selective Pallet Racking, a storage system designed to provide ready access to every pallet.

It can be serviced by virtually any type of forklift including Counterbalance and Reach Trucks. Requiring a relatively low capital investment, selective pallet racking is ideal where flexibility, access and speed of operation are the main objectives of the system. Selective pallet racking can also be easily adjusted or relocated at any time.

LIGHT DUTY RACKING:

PMB Shelving's light duty racking system consists of light duty frames and beams for industrial storage applications. This product is very versatile and is a cost-effective solution.

When racking is too big and shelving is too light, the answer is light duty racking. This system of racking has found use amongst many different industries including homes and garages, it has found favour with major file storage companies and light goods warehousing.

NARROW AISLE RACKING:

This system is served by specialized high lift fork rotating materials handling devices operating in very narrow aisles.

The benefit being up to 50% saving in aisle width when compared to a counter balance forklift, whilst achieving up to double the stacking height.

RACKING SYSTEMS AND SOLUTIONS

DRIVE IN RACKING:

It is purposely designed to provide the space efficiency and high-volume storage of block stacking, with easy access to pallets. It is ideal for industry with high pallet quantities.

Available up to 12 metres high, PMB's Drive in Racking is tailored to pallet, load size and handling equipment.

Picking and replenishment is facilitated by means of conventional forklift trucks, keeping costs to a minimum. Channels can only be served in one direction.

PUSH BACK RACKING:

PMB's Push Back Pallet Racking provides a highly effective use of space by combining high-density storage with high-speed access. The system offers safe and dense storage for 2, 3 and 4 pallet deep storage. Typically up to 5 pallets high.

Pallets are gravity fed via the front using conventional handling equipment and retrieved from the same aisle, so the pick face remains constantly full.

Push Back Racking operates on the FILO (First In, Last Out) principle.

DATA STRIPS AND PRICE LABELLING

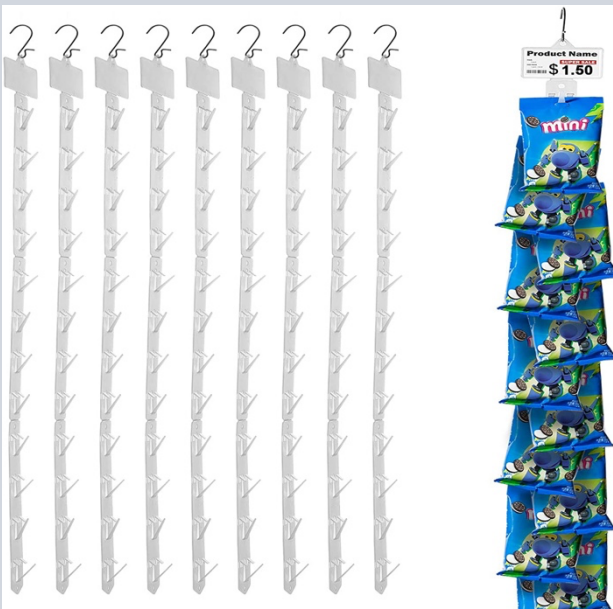

EUROSTRIPS

- Standard with tape application
- Fits 30mm price label
- 200pcs/carton
- Standard lengths: 914, 1000, 1220mm
- Non-standard lengths available on request, subject to minimum order quantities
- Special colours subject to minimum quantities

SWINGTAGS

- Attach onto 5-12mm diameter bar
- 95 x 34mm price label
- 500pcs/carton
- Special colours subject to minimum quantities

MULTI MERCHANDISER

- Complete 12 station + S-hook & label holder
- Fits 95 x 34mm price label
- 500pcs/carton
- Special colours subject to minimum quantities

TROLLEYS & WHEELS

Wheelbarrow Wheels

- Available with 25mm plain bore or ball bearing

SER Wheels

- Elastic rubber tyred wheel
- Sizes available: 80, 100, 125, 150 and 200mm

Coke Trolley

- Load capacity of 225kg's
- Wheel diameter: 200mm
- Size: 1200mm (H) x 540mm (W) x 280mm(N)

Folding Nose Trolley

- Load capacity of 180kg's
- Wheel diameter: 200mm
- Available in 2 Sizes

Platform Trolley – Fixed Handle

- Steel platform
- Available in galvanized, powder-coated or with wooden deck
- Load capacity of 500kg's
- Wheel diameter: 200mm
- 100mm/125mm castors fitted

Rocker/Mammoth Trolley

- Steel deck with galvanized finish
- Load capacity of 700kg's
- Wheel diameter: 200mm with 125mm castors
- Size: 1500mm (L) x 600mm (W) x 1100mm (H)

TROLLEYS & BASKETS

- Super Shopper Trolley**
- Double basket steel trolley
 - 125mm Castors
 - Electroplated finish

- 2 Tier Basket Trolley**
- Galvanised finish
